

The PVCC Engineering Club (PEC)

Minutes: October 18, 2004

The meeting started at 12:30.

PVCC Engineering Club president Kenny Neal opened the meeting by giving an update on the proposed Sperry Marine field trip. A new company now owns Sperry and has made some changes in security regulations. As a result the PEC field trip must be approved by upper management, hopefully in the near future.

New member Vincent Sun told the club about a new business in Charlottesville that produces electric motors. He said that four UVa engineering graduates started the company and he will contact them to try and arrange a field trip. He also mentioned the possibility of having his friend, a UVa engineering professor, come in and give a lecture.

Tanzir has updated the website!

Respectfully Submitted,

D.J. McGill – Secretary, PVCC Engineering Club
