

ADAPTIVE RELEASE

Desired Control of Content	Tool to Use
Make content appear/disappear before or after a certain date, or between two dates	Click the Manage button, and use the Adaptive Release feature. Set the dates in the Display after and Display before sections. Remember to check the box if setting a date. Scroll to the bottom of the page and click Submit .
Make content available to specific users or groups in the class	Click the Manage button, and use the Adaptive Release feature. Under Membership, click the Browse button then the Search button. Check the selected users and click the Submit button. Scroll to the bottom of the page and click Submit .
Make content available based on a Gradebook item criteria	After previously creating an item in the Gradebook (online test/online assignment / or a created item), click the Manage button, and use the Adaptive Release feature. Under Gradebook Item, use the drop-down menu to select a gradebook item. Then select the condition. Scroll to the bottom of the page and click Submit .
Make content available based on a Review status	Click the Manage button, and use the Adaptive Release feature. Under Review Status, click the Browse button. The course map will appear. Click on the specific item/folder that must be checked Reviewed before making this content available. Scroll to the bottom of the page and click Submit .

NOTE: Multiple criteria may be added to a single item but a student must meet all criteria in order to access the material.
